A is for
ANT
— march!

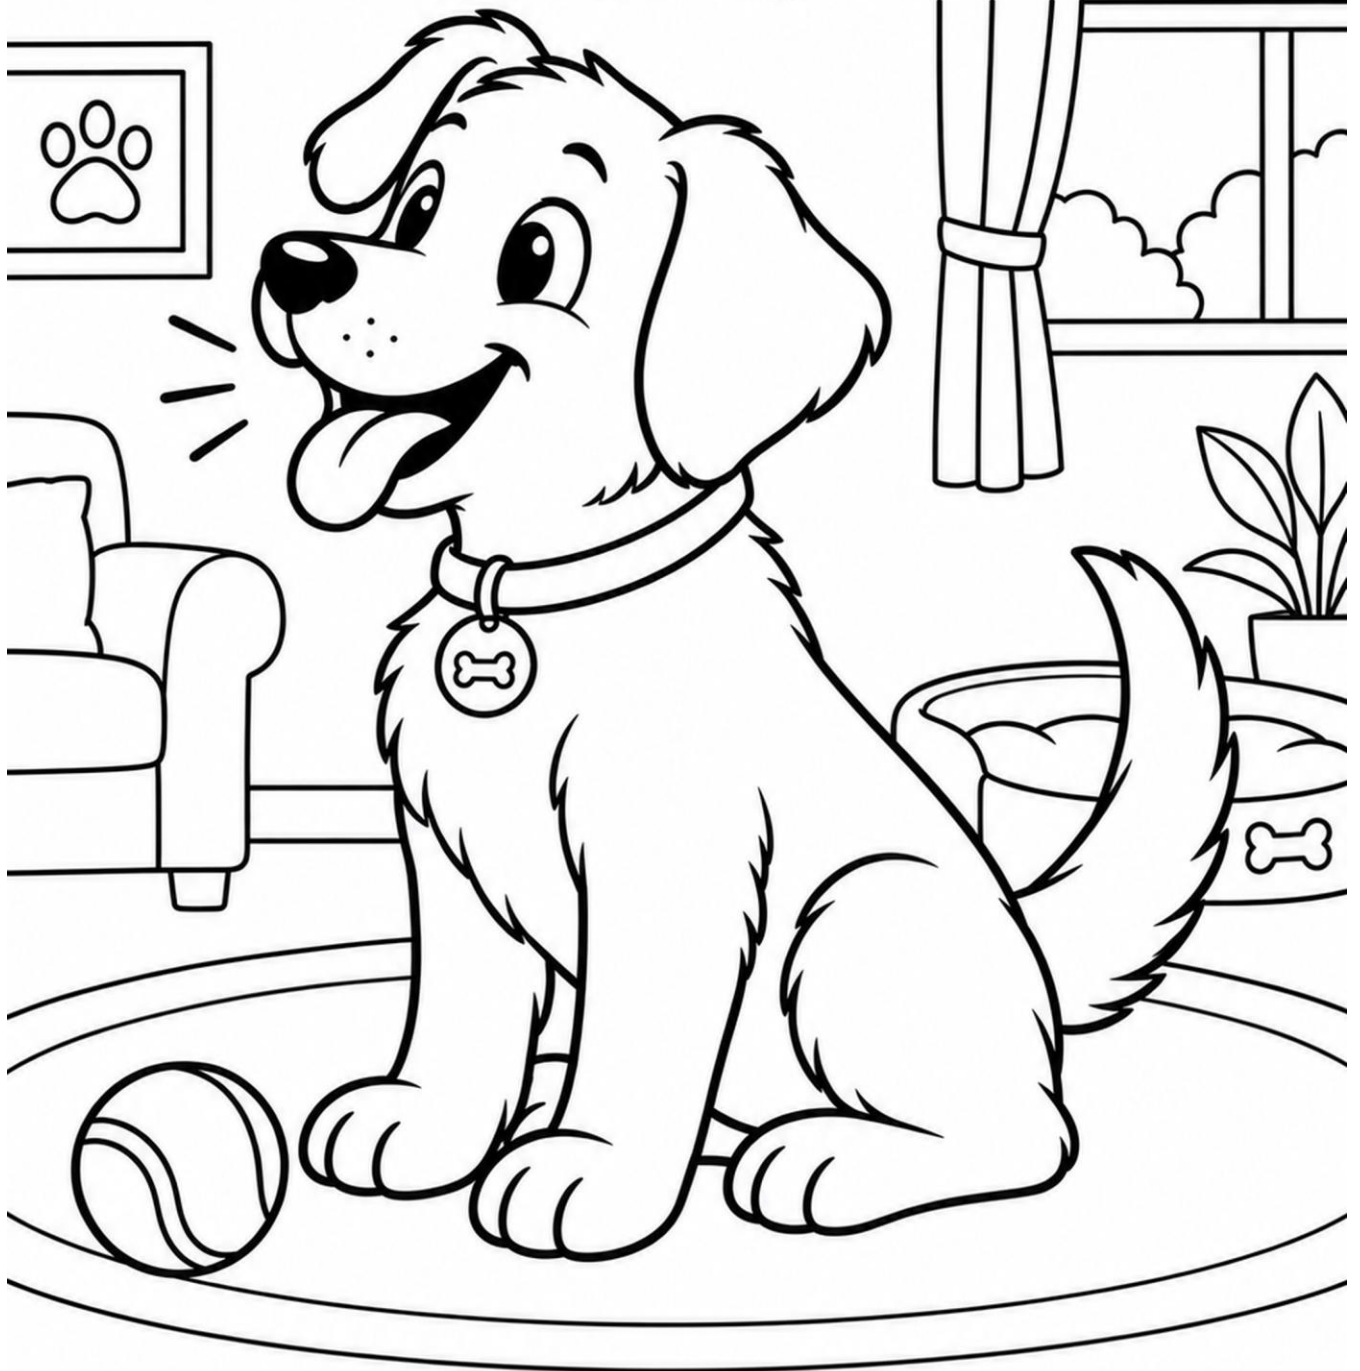

B is for
BEAR
— growl!

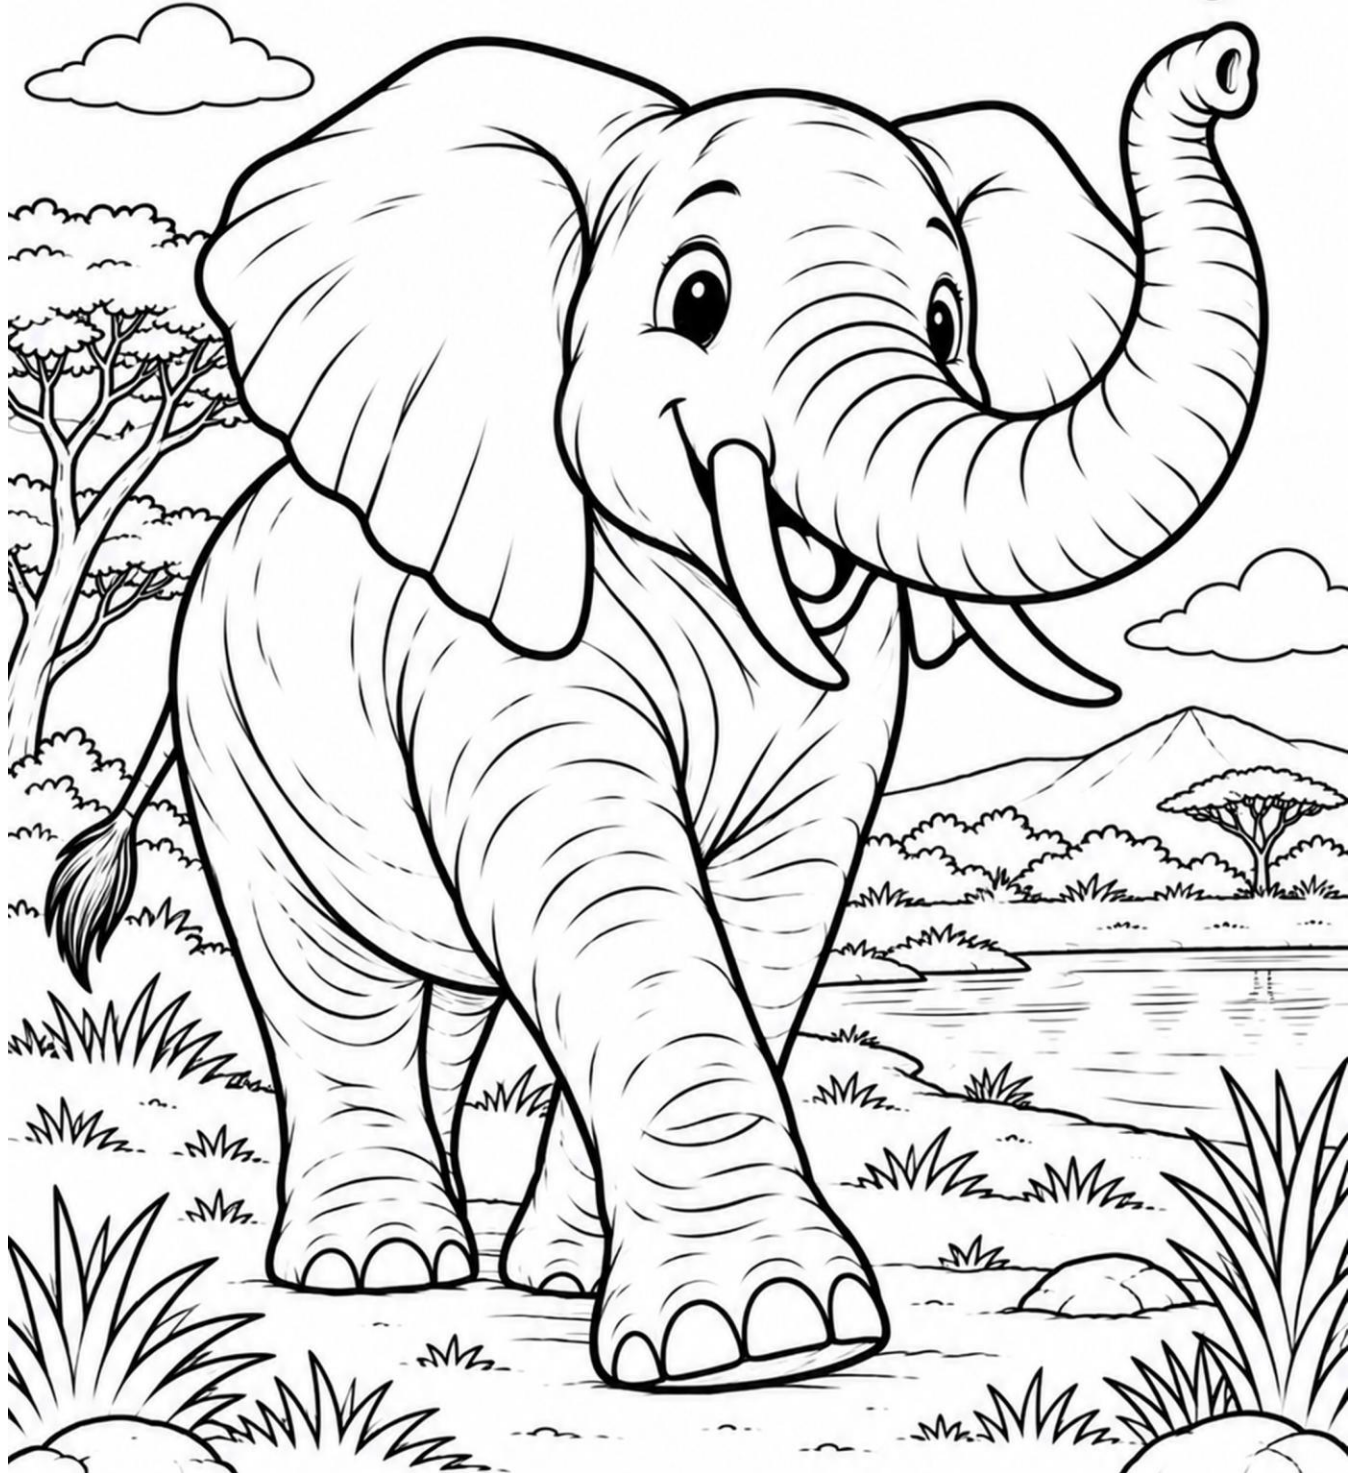

is for
CAT
— meow!

D is for **DOG** — woof!

E is for
ELEPHANT
— big!

Meet the Animals

ANT

Ants are tiny insects that live together in groups called colonies. They use their antennae to smell, touch, and share messages. Some ants can carry things much heavier than their own bodies!

BEAR

Bears are large mammals with thick fur and strong legs. Many bears eat berries, plants, insects, and fish. A baby bear is called a cub!

Meet the Animals

CAT

Cats have soft paws, sharp claws, and sensitive whiskers. Their whiskers help them feel objects nearby. Cats may purr when they feel happy and safe.

DOG

Dogs have an excellent sense of smell. They communicate by barking, moving their tails, and changing their body positions. A baby dog is called a puppy!

ELEPHANT

Elephants are the largest animals that live on land. They use their trunks to breathe, smell, drink, and pick things up. Elephant families take care of one another.
